

#### ADVANTAGES OF 14MM OVERLAY

- 1) Height, only 14mm thickness and is able to be glue directly to concrete or existing floor.
- 2) Less acclimation required.
- 3) No top nailing required
- 4) Future sanding possible due to wear layer.

TIMBERS

14 mm Off-center Milled

Wider shoulder makes for a more stable product under floor expansion

12 mm Center Milled

# 14MM OVERLAY T & G FLOOR

**COLOUR** - Wide variety of species

**WIDTH** - 83mm, 130 & 180mm

**SIZES AND LENGTHS** - Board lengths range from 0.6m to 4.5m

**PROFILE** - The unique profile of our wide board overlay incorporates a distinct offset tongue and groove. This gives the floor an equivalent wear layer to thicker flooring products and also increases the stability of the floor when under pressure from expansion.

**APPEARANCE** - When looking at a finished 'Fourteen' Secret Nailed Wide Board Overlay Floor there is one

significant difference and that is the absence of top nail fixing. 'Fourteen' has been specifically designed to be secretly fixed using a combination of adhesives and mechanical fixing.

**HEIGHT ADVANTAGES** - Flooring Standard profile wide board floors when fixed as recommended (face nailed) to battens over a concrete slab have a finished height of 54mm. 'Fourteen' wide board overlay floors fixed to plywood over a concrete slab have a finished height of only 29mm.

#### THE 14 SERIES IS PRE-STRAIGHTENED AND FLATTENED FOR EASE OF INSTALLATION.

Fourteen' Secret Nail Wide Board Overlay has been specifically developed and manufactured to provide a wide board flooring product with improved stability.

Due to the board being thinner we are able to achieve better drying with more consistent moisture content through the floor board.

With thinner flooring fully trowel glued the adhesive has a greater ability to hold down the top shoulders minimizing cupping and movement. With today's fixing technology it should not be presumed that thicker boards will be more stable.

A unique product specific drying and processing procedures. The 'fourteen' series is straight lined before profiling to produce a straight, flat floor that is easier and quicker to install.

#### WHY IT DIFFERS TO STANDARD PROFILE WIDE BOARD FLOORING

- 1) Wide Board Overlay has been specifically straightened and is manufactured to shorter lengths to provide a straighter bow and less spring.
- 2) Wide Board Overlay with its more precise manufacturing processes provides a product that is less prone to cupping and movement at manufacture.
- 3) Wide Board overlay has the tongue and groove machined off centre to provide the same wear thickness as standard profile wide boards.
- 4) Wide Board Overlay milled to secret nail profile.
