

STAINED BLACKBUTT DARK BROWN

OAK STAINED BROWN

NASH TIMBERS STAINED FLOORS

Points of consideration to discuss with client.

- A Certain timber species will absorb the stain more
- B There will always be a colour variation in timber when staining and liming.
- C Floor must be sanded correctly or finish will be uneven
- D. Walls, skirting boards, joinery and tiles must be sealed. Painter to do final coat after staining or liming and Floor Layer buffs and seals floor after painter finished.
- E. The tannin will can come out of Blackbutt through the staining process use a finish to prevent this happening.
- F. Finishes react differently on all species highlighting the reds or yellows or cause less yellowing or bleaching.

Oak stained with a blue tinge
