

## Whittle Wax Finish Data Sheet

### **Description**

A high quality blend of natural waxes and essential oils to protect and enhance a wide range of interior surfaces, including timber, cork, stone, marble and engineered boards

### **Benefits**

- High quality
- All natural, non-toxic
- Dirt repellent
- Anti-static and anti-slip
- Wide range of applications
- Enhances and protects

### **Properties**

High quality, selected natural waxes and essential oils. Contains no chlorinated solvents, preservatives or formaldehyde. Contains no toxic substances. Anti-static, anti-friction and anti-slip, dirt repellent, maintains, protects, enhances, keeps surfaces gas permeable, dries colourless, odourless when dry, serves as a protective foundation and also for subsequent maintenance and cleaning

### **Areas of use**

Used for all heavily-used interior wood and cork surfaces (also for those pre-waxed during production) linoleum, PVC, plastic coverings, stone-wood, marble, ceramic floor tiles and other solvent resistant surfaces. It is recommended to pre-treat untreated floors.

### **Usage**

The surface must be sound, free of residues, clean (e.g. oil and grease free) and dry. A test application on an area of floor not previously impregnated is recommended.

Apply thinly and evenly by brushing with a cotton cloth or mechanically.

Polish as soon as the wax layer is dry (approx. 1 to 3 hours, the surface should no longer be wet or shiny). If the surface still shows dull patches after polishing, allow to dry fully and polish again. The drying time at around +20°C / 55 % rel. humidity is 1 to 3 hours. If there are smears visible over the entire waxed area these may be polished away with a white nylon pad and a buffing machine

If required (e.g. if the wax film is partially worn away), Wax Finish may be applied after every thorough clean. There should always be just a thin film of wax present.

### **Coverage**

1L for approx. 25 -30 m<sup>2</sup> per coat.

**Drying Time**

N/A

**Storage**

Several years for dry storage in the unopened original condition. Recommended storage temperature: Above 8°C.

**Colours**

Colourless

Note

N/A

**Contents**

De-aromatised hydrocarbons and purified natural waxes.

Container sizes

1L, 2.5L, 5L, 10L and larger.
