

# Fourteen Secret Nail Wide Board Overlay

## Performance

'Fourteen' Secret Nail Wide Board Overlay has been specifically developed and manufactured to provide a wide board flooring product with improved stability.

Due to the board being thinner we are able to achieve better drying with a more consistent moisture content through the floor board. With thinner flooring fully trowel glued the adhesive has a greater ability to hold down the top shoulders minimizing cupping and movement.

With today's fixing technology it should not be presumed that thicker boards will be more stable.

## Manufacturing

Hurford Hardwood have developed unique product specific drying and processing procedures. The 'fourteen' series is straight lined before profiling to produce a straight, flat floor that is easier and quicker to install.

## Height Advantages

Standard profile wide board floors when fixed as recommended (face nailed) to battens over a concrete slab have a finished height of 54mm. 'Fourteen' wide board overlay floors fixed to plywood over a concrete slab have a finished height of only 29mm.

## Appearance

When looking at a finished 'Fourteen' Secret Nailed Wide Board Overlay Floor there is one significant difference and that is the absence of top nail fixing. 'Fourteen' has been specifically designed to be secretly fixed using a combination of adhesives and mechanical fixing.

## Flat, Straight and Stable

The 'fourteen' series is pre-straightened and flattened for ease of installation. Hurford Hardwood have developed unique product specific drying and processing techniques that

assure the quality and stability of all 'fourteen' floors.

## Sizes and Lengths

'Fourteen' is available in two sizes, 130mm x 14mm and 180mm x 14mm. Board lengths range from 0.6m to 4.5m

## Profile

The unique profile of our wide board overlay incorporates a distinct offset tongue and groove.

This gives the floor an equivalent wear layer to thicker flooring products and also increases the stability of the floor when under pressure from expansion.

## Species / Grades

'Fourteen' is available in a wide variety of species and grades. This diverse spectrum of colour and feature is broad enough to complement any design requirement.
