

QUICK-STEP UNDERLAY FOR TIMBER FLOORING

Underlays reducing reflection sound

QUICK-STEP COMBI-LAY STANDARD

The all-in-one underlay for Quick-Step Laminate, Timber and Bamboo.

Combi-Lay Standard is the ideal 'all-in-one' underfloor for your Quick-Step Laminate, Timber or Bamboo floor.

Underlays reducing transmission sound

This is the sound you hear when someone walks on these hindering noises, Quick-Step has developed highly recommended for multi-level buildings.

QUICK-STEP QUIET-STEP COMBI-LAY

A premium underlay specifically designed to reduce transmission sound

Quiet-Step Combi-Lay is a superior underlay specifically designed to reduce foot noise and disturbing transmission sounds in multi-story buildings. It's therefore the perfect choice for upper floors or apartments.

Why Quick-Step underlays?

- ✓ **Long-term sound absorbance**
Quick-Step underlays maintain their initial thickness over the years. You can rest assured: they will continue to dampen sounds such as the tapping of high heels for many years.
- ✓ **Ideal for Uniclic Multifit**
The smooth surface of Quick-Step underlays prevents parts of the underlay from getting stuck in between the Uniclic Multifit tongue and groove during installation. Moreover all Quick-Step underlays offer a stable base which protects the Uniclic Multifit click system.
- ✓ **Levelling effect**
Small irregularities or damage to the floor base can easily be levelled out.
- ✓ **Excellent protection against damp**
A damp-proof and moisture-resistant membrane with an adhesive strip has already been integrated into the levelling underlay. This will save you a lot of time and effort.

- ✓ underlays reducing **reflection sound**
