

SIMPLE FACTS ABOUT OUR FORESTS

- 8.5+ million native trees planted
- 400+ biodiverse forests planted across Australia
- 2+ million tonnes of greenhouse gases absorbed
- Our forests provide essential habitat for native wildlife
- Our forests improve water quality in river and streams
- Our forests reduce salinity and erosion
- Our forests provide windbreaks and shelter for crops and livestock

Since 1997, Greenfleet has planted over **8.5 million native trees** creating more than [400 biodiverse forests](#) in Australia, on behalf of thousands of business supporters such as *Nash Timbers* to sequester carbon emissions and protect our unique biodiversity. *Nash Timbers plant one tree to approximately every 70sqm Australian flooring purchased through Nash Timbers.*

Greenfleet establishes self-sustaining, multi-species forests to absorb greenhouse gases from the atmosphere and restore natural ecosystems. We put back the mix of native species that would have been present in the local area prior to land clearing. By doing so, our forests also act as sanctuaries for native wildlife who can safely return to their natural habitat.

WHAT TREES DOES GREENFLEET PLANT?

Greenfleet establishes self-sustaining, multi-species forests. It means that as well as planting trees native to the local area, we also plant a mix of native trees to restore the native vegetation present prior to settlement and land clearing.

To date we have planted over **8.5 million native trees with a mix of over 400 different indigenous species.**

Planting a biodiverse mix of native species is the only way to ensure that the resulting forest is ecologically sustainable.

Planting native forests has a number of extra environmental benefits:

- Biological diversity is improved;
- Habitat for native animals is increased and migratory routes extended;
- Salinity can be reduced;
- Water quality in the catchment can be improved;
- Tree roots can bind the soil to reduce erosion.

Greenfleet works with local nursery who source the local seeds and grow the native seedlings for our revegetation projects.

TREE PLANTING CERTIFICATE

This document certifies that **2 Australian Native Trees**
Have been planted in the name of

Nash Timbers

Nash Timbers

**Value your support and in appreciation we have planted 2 Australian Native Trees
Through Greenfleet**

For every xxx m2 of timber sold, Nash Timbers purchases xxx trees through Greenfleet. Greenfleet's mission is to protect our climate by restoring our forests. They plant Australian native forests to offset carbon emissions on behalf of thousands of individuals, businesses, NGOs, councils and universities.

Since 1997, Greenfleet has planted over 8.5 million native trees in more than 400 biodiverse forests around Australia. As a family business, Nash Timbers is proudly supporting and giving back to the environment by supporting Greenfleet
