

# Welcome to Nash Timbers

## Welcome to Nash Timbers News August 2014

High Quality Timber Flooring, Decking and  
Solid Timber Flooring

### NASH TIMBERS INTERACTIVE DIGITAL SYSTEM

This innovative and exciting announcement from Nash Timbers is the completion of their interactive PDF Select System and Timber Floor Site Inspection System which is electronically accessible for I Pads and I Phones.

At the end of August the system will be completed and available to our clients to access. This will give our clients a comprehensive digital select system when choosing and using timber in your projects.

Timber flooring installation systems and techniques are explained plus, our detailed electronic Site Checklist helps our client address all issues that will affect the outcome of obtaining the ideal conditions for their timber floor stability. Nash Timbers are using a calculated formula to measure the moisture content of the timber floor which then allows us to install the floor with evidence based results which should result in a more stable floor.
