TIMBER GRADING SYSTEM

Timber Grading

Grade refers to the amount of feature visible in the timber flooring.

Features are caused by knots, insects, fire and gum vein

Prestige Grade:

Prestige grade is a combination of select & some high end standard grade

Standard Grade:

(Medium Feature): Flooring in this grade will be moderately featured. Gum veins, gum pockets, insect trails, burls and borer holes, are some of the characteristic's that will be more prevalent in Standard Grade

Rustic Grade:

Rustic grade is a combination of standard grade & feature grade. It may contain some features that are more prominent than feature grade but still maintain structural integrity

Antique Grade: is a combination of select grade, standard grade & feature grade, again it may contain some features that are more prominent than feature grade but still maintain structural integrity

Prime Grade and Selected Grade are terms that can you be used for Jarrah and American White Oak, which refers to the top grade for the species.

Select Grade

The Features that are present in Select grade flooring are relatively small and few in number, and although they are visible the features do not dominate the appearance of the floor.

Standard and Better Grade

Rule of Thumb: 80% Select, 20%Standard

Feature Grade

Feature grade flooring is heavily peppered with natural features particularly large gum veins
